#### First Day of Autumn Activities

##### 1. Clean up your home

Cleaning up now means there will be less dust on surfaces when the weather gets cold and wet outside. So get your cleaning gear ready and get to work.

##### Get your furnace ready

The furnace is the most crucial part of any home heating system, so make sure it's in tip-top shape before the cold weather hits. Also, have your heating system inspected by a professional.

##### Prepare your clothes

Now is the time to prepare your clothes for when the temperatures drop. You can start by putting away any summer clothes that aren't going to get much use this season.

#### NATIONAL ICE CREAM CONE DAY

Despite the official end of summer, National Ice Cream Cone Day continues celebrating on September 22! I scream! You scream! We all scream for ice cream!

#### FULL CORN MOON

THE OLD  
FARMER'S ALMANAC

#### When to See the Full Moon in September 2025

This year, September's full Corn Moon will peak illumination at 2:09 P.M. Eastern Time on Sunday, September 7. It will be below the horizon at this time, so be sure to watch for it after sunset.

#### Why Do We Call it the Corn Moon?

This time of year—late summer into early fall—corresponds with the time of harvesting corn in much of the northern United States.
